E.K. RIVIN WEERAKA

Software Engineer

Matara, Sri Lanka

(+94) 70 247 9612 weerakarivin@gmail.com Rivin Weeraka Rivin2001

ABOUT ME

Results-driven Software Engineer and Tech Entrepreneur with over 1 years of experience in developing enterprise-grade applications and automated systems. Proficient in JavaScript (React, Node.js) and Python, with a strong track record of launching scalable, highly testable products in fast-paced startup environments. Experienced in the full software development lifecycle, ensuring excellent software quality through comprehensive testing and innovative problem-solving.

EDUCATION

INFORMATICS INSTITUTE OF TECHNOLOGY (IIT) | (Sept 2023 – Present) - BEng (Hons) Software Engineering

- Currently reading for the degree with a focus on Full Stack Development and Enterprise Applications.
- Key Modules: Object Oriented Programming (OOP), Data Structures & Algorithms, Database Management Systems, Web Application Development.

Academy Of Computer Programming And Training (ACPT)

- Completed the 6-month intensive program focusing on industry-standard web development technologies and practical software implementation.
- Gained practical experience in building scalable web applications using Java for backend processing and React for dynamic frontend interfaces.

SW Law Education Center (Aug 2024 – Feb 2025) Diploma in Law Education

- Completed the diploma covering fundamentals of legal education.

Evo Tech Education | Certificate in Java Programming

- Successfully completed the course covering Core Java fundamentals, Object Oriented Programming (OOP) concepts, and application development.

Rahula College, Matara | 2017 – 2019 G.C.E. Advanced Level

- Biological Science Stream: Successfully completed.

WORK EXPERIENCE

INFORMATICS INSTITUTE OF TECHNOLOGY (August 2025– February 2026)
Full Stack Engineering Intern

Dynamic PDF-to-Excel Data Mapper (Angular):

- Engineered a schema-driven data extraction tool allowing users to upload a reference Excel template alongside a PDF.
- Implemented algorithms to parse the PDF, automatically map data to the dynamic headers defined in the Excel file, and generate a downloadable, populated Excel report.

PDF Table Recognition & Preview Module(Angular):

- Developed a specialized web interface to process unstructured PDF documents.
- Built an intelligent detection system to identify and extract only tabular data from PDFs, rendering a real-time preview for user verification.

Secure Student Inquiry Portal (For IIT Registry Department):

- **Technologies: Google Apps Script(Server), Google Sheets (as Database), HTML, CSS, JavaScript, Google Sites, Google OAuth 2.0**
- **Technical Challenge:** Overcame a limitation in standard Google Forms, which lacks the ability to cross-reference user data against a Spreadsheet database or identify users securely within embedded environments.

- **Solution:** Engineered a custom Google Apps Script Middleware with OAuth 2.0 authentication to verify student eligibility against a backend Spreadsheet.

- **Identity Resolution Mechanism:** Implemented a secure PIN-based session bridge (OTP) to overcome Google Sites' iframe isolation. This mechanism links the embedded form to the authenticated user's session, accurately identifying the user and preventing anonymous or unauthorized submissions.

- **Cost Efficiency:** Fulfilled a strict client requirement for a zero-cost solution, proactively developing this internal tool to replace potential paid enterprise software, **resulting in significant budgetary savings for the department.**

Lead Generation & Data Automation System (RC Rentals)

- Engineered an automated web scraping system using Python to extract targeted data from Facebook, optimizing customer acquisition.
- Developed custom algorithms to identify and filter tourist profiles, directly generating high-quality leads for the vehicle rental business.
- Streamlined the marketing workflow by automating data collection, significantly improving targeted marketing campaigns and business growth.
- Tech Stack: Python, Data Scraping (Selenium/BeautifulSoup), Data Analysis.

Lead Developer & Founder - Sithseavana.lk

* Architected and successfully launched Sri Lanka's first bilingual (Sinhala and English) online counseling and wellbeing platform.

- Led the end-to-end software development lifecycle (SDLC) from UI/UX design to backend implementation and deployment.
- Implemented robust localization features to ensure a seamless experience for a diverse, multi-lingual user base.
- Designed scalable databases and secure user authentication to protect sensitive user data.
- Tech Stack: React, Node.js, Database Management (Firebase), Web Hosting.

Freelance Full-Stack Developer & Tech EntrepreneurSelf-Employed | Jan 2025 – Present

- Architected and successfully launched Sithseavana.lk, Sri Lanka's first bilingual (Sinhala and English) online counseling and wellbeing platform.
- Led the end-to-end software development lifecycle for Sithseavana, from database design (Firebase) to backend implementation and deployment.
- Engineered an automated web scraping system using Python to extract targeted data from Facebook, optimizing customer acquisition for a vehicle rental business.
- Developed custom algorithms to identify and filter tourist profiles, directly generating high-quality leads and streamlining the marketing workflow

Student Registration Management System (Self-Initiated Individual Project)

- **Technologies: Angular, Spring Boot, MySQL, REST API**
- Independently developed a full-stack application to demonstrate mastery of enterprise-level frameworks during personal study time.
- Designed a RESTful backend using Spring Boot to handle complex CRUD operations for student records.
- Built a responsive and dynamic frontend using Angular, ensuring seamless integration with the MySQL database.

ACADEMIC PROJECTS -

Flight Ticket Booking SystemTechnologies: Java (OOP)

- Developed a robust console-based application allowing users to check seat availability, select preferred seats, and process ticket bookings.
- Applied core Object-Oriented Programming (OOP) principles to manage booking logic and data structures effectively.

MediConnect (Group Project)

- Technologies: Next.js, Web Development
- Contributed to a healthcare software solution by developing the Feedback & Inquiry Module.
- Utilized Next.js to create a high-performance, server-side rendered form for collecting user feedback.

'Life on Land' - Interactive Web Page

- Technologies: HTML5, CSS3, JavaScript
- Collaborated with a team to design an interactive educational web page.
- Focused on responsive UI design and DOM manipulation using vanilla JavaScript.

Exam Result Analysis Tool

- Technologies: Python, Matplotlib/Pandas
- Designed a data visualization tool to process student exam results and generate graphical representations.
- Implemented Histograms to analyze score distributions, aiding in statistical performance evaluation.

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

School Cadet Corps

- Achievement: Won 1st Place at the Rantabe Assessment Camp Championship.
- Developed strong teamwork, discipline, and resilience while operating under high-pressure environments.

Entrepreneurship & Leadership

- Owner: RC Rentals (Matara) – Gained practical experience in customer relationship management and resource handling.

Sports & Recreation

- Swimming (2016): Active participant in school swimming meets and training programs.
- Chess: Competed in inter-school Chess Tournaments, enhancing strategic thinking skills.

SKILLS

Technical Skills

- Languages: Java (Advanced), JavaScript, TypeScript, Python, Google Apps Script.
- Frontend & Mobile: Angular, React.js, React Native, Next.js, HTML5, CSS3.
- Backend: Spring Boot, Microservices Architecture, Node.js.
- Databases & Cloud: MySQL, Supabase,firebase, Google Sheets (as DB).
- Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA.
- Specialized Skills: Web Scraping (Selenium/BeautifulSoup), Data Automation, Lead Generation, Bilingual UI/UX Localization

Professional Skills

- Leadership: Proven experience leading teams in Cadet Corps and entrepreneurial ventures.
- Problem-Solving: Ability to engineer creative solutions for complex technical challenges (e.g., Security logic in App Script).
- Teamwork: Strong collaborator in Agile development environments and group projects.
- Creativity: Innovative mindset in developing cost-effective software solutions.
